Bob:

In response to the request in your November 27 email, attached are the sampling plans used by Arkema for the on-site and off-site sampling at the Crosby facility. I am sending these by an external sharefile site because they are too large to send by email. Despite that some of them are labeled draft, these were not further revised and are the versions of the plans that were used.

The analytical methods that were used are set out in the plans. The only immediate difference that I see between the list in your November 27 email and what is specified in the plans is the analytical method for metals in water samples.

Consistent with Arkema's agreement with you, EPA, and TCEQ, this email is also being sent to representatives of those agencies so they will have the same access to the documents being provided to Harris County Pollution Control Services Department.

Please let me know if you have any questions or have trouble accessing the documents.

Chris
